

Grupo Aeroportuario del Centro Norte, S.A.B. de C.V.

# 2024 CDP Corporate Questionnaire 2024

Word version

**Important: this export excludes unanswered questions**

This document is an export of your organization's CDP questionnaire response. It contains all data points for questions that are answered or in progress. There may be questions or data points that you have been requested to provide, which are missing from this document because they are currently unanswered. Please note that it is your responsibility to verify that your questionnaire response is complete prior to submission. CDP will not be liable for any failure to do so.

[Terms of disclosure for corporate questionnaire 2024 - CDP](#)

# Contents

## C1. Introduction

### (1.1) In which language are you submitting your response?

Select from:

English

### (1.2) Select the currency used for all financial information disclosed throughout your response.

Select from:

MXN

### (1.3) Provide an overview and introduction to your organization.

#### (1.3.2) Organization type

Select from:

Publicly traded organization

#### (1.3.3) Description of organization

*Grupo Aeroportuario del Centro Norte, S.A.B. de C.V., which we refer to by the acronym "GACN" or "OMA", is a corporation (sociedad anónima bursátil de capital variable) organized under the laws of Mexico. We were incorporated in 1998 as part of the Mexican government's program for the opening of Mexico's airports to private investment. The duration of our corporate existence is indefinite. We are a holding company and conduct substantially all of our operations through our subsidiaries. Through our subsidiaries, we hold concessions to operate, maintain and develop 13 airports in Mexico, which are concentrated in the country's central and northern regions. Each of our concessions has a term of 50 years beginning on November 1, 1998. The term of each of our concessions may be extended by the Ministry of Infrastructure, Communications and Transportation under certain circumstances for up to 50 additional years. The terms of our concessions also include the right to occupy, use and improve the land appurtenant to our airports, which we do not own and which will revert to the Mexican government upon the termination of our concession. As operator of the 13 airports under our concessions, we charge fees to airlines, passengers and other users for the use of the airports' facilities. We also derive rental and other income from commercial and diversification activities conducted at our airports, such as the leasing of space to restaurants and retailers, the operation of parking facilities, the operation of the OMA Carga business, the Terminal 2 NH Collection Hotel and the Hilton Garden Inn Hotel at the Monterrey airport, among others. We operate 13 airports, which serve a major metropolitan area (Monterrey), three tourist destinations (Acapulco, Mazatlán and Zihuatanejo), seven regional centers (Chihuahua, Culiacán, Durango, San Luis Potosí, Tampico, Torreón and Zacatecas) and two border cities (Ciudad Juárez and Reynosa). Our airports are located in nine of the 32 Mexican states, covering a territory of approximately 926,421 square kilometers (575,667 square miles), with a*

population of approximately 29.0 million according to the Mexican National Institute of Statistics and Geography. All of our airports are designated as international airports under Mexican law, meaning that they are all equipped to receive international flights and to maintain customs and immigration services managed by the Mexican government, as well as refueling services. The Company's energy requirements arise mainly from electricity consumption, which is used for illumination and air conditioning at airports, and to a lesser extent, the use of fuels such as gasoline, diesel, natural gas, and LP gas used in construction machinery and vehicle transport.

[Fixed row]

**(1.4) State the end date of the year for which you are reporting data. For emissions data, indicate whether you will be providing emissions data for past reporting years.**

**(1.4.1) End date of reporting year**

12/31/2023

**(1.4.2) Alignment of this reporting period with your financial reporting period**

Select from:

Yes

**(1.4.3) Indicate if you are providing emissions data for past reporting years**

Select from:

Yes

**(1.4.4) Number of past reporting years you will be providing Scope 1 emissions data for**

Select from:

3 years

**(1.4.5) Number of past reporting years you will be providing Scope 2 emissions data for**

Select from:

3 years

### (1.4.6) Number of past reporting years you will be providing Scope 3 emissions data for

Select from:

Not providing past emissions data for Scope 3

[Fixed row]

### (1.4.1) What is your organization's annual revenue for the reporting period?

14457080000

### (1.5) Provide details on your reporting boundary.

	Is your reporting boundary for your CDP disclosure the same as that used in your financial statements?	How does your reporting boundary differ to that used in your financial statement?
	Select from: <input checked="" type="checkbox"/> No	In our reporting boundary we only include airports operations.

[Fixed row]

### (1.6) Does your organization have an ISIN code or another unique identifier (e.g., Ticker, CUSIP, etc.)?

#### ISIN code - bond

### (1.6.1) Does your organization use this unique identifier?

Select from:

No

#### ISIN code - equity

**(1.6.1) Does your organization use this unique identifier?**

Select from:

Yes

**(1.6.2) Provide your unique identifier**

US40050110022

**CUSIP number**

**(1.6.1) Does your organization use this unique identifier?**

Select from:

Yes

**(1.6.2) Provide your unique identifier**

400501102

**Ticker symbol**

**(1.6.1) Does your organization use this unique identifier?**

Select from:

Yes

**(1.6.2) Provide your unique identifier**

OMAB

**SEDOL code**

**(1.6.1) Does your organization use this unique identifier?**

Select from:

Yes

## (1.6.2) Provide your unique identifier

400501102

### LEI number

## (1.6.1) Does your organization use this unique identifier?

Select from:

No

### D-U-N-S number

## (1.6.1) Does your organization use this unique identifier?

Select from:

No

### Other unique identifier

## (1.6.1) Does your organization use this unique identifier?

Select from:

No

[Add row]

## (1.7) Select the countries/areas in which you operate.

Select all that apply

Mexico

## (1.24) Has your organization mapped its value chain?

### (1.24.1) Value chain mapped

Select from:

- Yes, we have mapped or are currently in the process of mapping our value chain

### (1.24.2) Value chain stages covered in mapping

Select all that apply

- Upstream value chain  
 Downstream value chain

### (1.24.3) Highest supplier tier mapped

Select from:

- Tier 1 suppliers

### (1.24.4) Highest supplier tier known but not mapped

Select from:

- Tier 2 suppliers

### (1.24.7) Description of mapping process and coverage

*Through our accounts payable and accounts receivable systems, we can visualize the different clients and suppliers we interact with. We can visualize this through SAP. We also have an internal control area who is in charge of reviewing all the suppliers of our corporation and different bidding processes, through where our contractors are selected.*

*[Fixed row]*

## (1.24.1) Have you mapped where in your direct operations or elsewhere in your value chain plastics are produced, commercialized, used, and/or disposed of?

### (1.24.1.1) Plastics mapping

Select from:

- Yes, we have mapped or are currently in the process of mapping plastics in our value chain

### (1.24.1.2) Value chain stages covered in mapping

Select all that apply

- Downstream value chain
- End-of-life management

### (1.24.1.4) End-of-life management pathways mapped

Select all that apply

- Recycling
- Landfill

[Fixed row]

## **C2. Identification, assessment, and management of dependencies, impacts, risks, and opportunities**

**(2.1) How does your organization define short-, medium-, and long-term time horizons in relation to the identification, assessment, and management of your environmental dependencies, impacts, risks, and opportunities?**

### **Short-term**

**(2.1.1) From (years)**

0

**(2.1.3) To (years)**

1

**(2.1.4) How this time horizon is linked to strategic and/or financial planning**

*This is related to short-term accounting standards such as short-term debt, short-term provisions, which are all of 1 year periods in the financial statements.*

### **Medium-term**

**(2.1.1) From (years)**

2

**(2.1.3) To (years)**

5

**(2.1.4) How this time horizon is linked to strategic and/or financial planning**

*This is due to that our Master Development Program negotiation is every 5 years.*

## Long-term

### (2.1.1) From (years)

6

### (2.1.2) Is your long-term time horizon open ended?

Select from:

No

### (2.1.3) To (years)

24

### (2.1.4) How this time horizon is linked to strategic and/or financial planning

*Our concessions expire in 2048, therefore horizon considers 2048 as the final date, even though there are provisions for potential renewals.  
[Fixed row]*

## (2.2) Does your organization have a process for identifying, assessing, and managing environmental dependencies and/or impacts?

### (2.2.1) Process in place

Select from:

No, but we plan to within the next two years

### (2.2.4) Primary reason for not evaluating dependencies and/or impacts

Select from:

No standardized procedure

### (2.2.5) Explain why you do not evaluate dependencies and/or impacts and describe any plans to do so in the future

OMA acknowledges the impact that its operations generate on the environment. We intend on doing a climate study in order to assess risks and opportunities related to climate change and the impacts it may generate throughout the value chain.

[Fixed row]

**(2.2.1) Does your organization have a process for identifying, assessing, and managing environmental risks and/or opportunities?**

	Process in place	Risks and/or opportunities evaluated in this process
	Select from: <input checked="" type="checkbox"/> Yes	Select from: <input checked="" type="checkbox"/> Both risks and opportunities

[Fixed row]

**(2.2.2) Provide details of your organization’s process for identifying, assessing, and managing environmental dependencies, impacts, risks, and/or opportunities.**

**Row 1**

**(2.2.2.1) Environmental issue**

Select all that apply

- Climate change

**(2.2.2.2) Indicate which of dependencies, impacts, risks, and opportunities are covered by the process for this environmental issue**

Select all that apply

- Risks

### (2.2.2.3) Value chain stages covered

*Select all that apply*

- Direct operations

### (2.2.2.4) Coverage

*Select from:*

- Partial

### (2.2.2.7) Type of assessment

*Select from:*

- Qualitative only

### (2.2.2.8) Frequency of assessment

*Select from:*

- Annually

### (2.2.2.9) Time horizons covered

*Select all that apply*

- Medium-term

### (2.2.2.10) Integration of risk management process

*Select from:*

- Integrated into multi-disciplinary organization-wide risk management process

### (2.2.2.11) Location-specificity used

*Select all that apply*

- Local
- National

## (2.2.2.12) Tools and methods used

### Enterprise Risk Management

- ISO 31000 Risk Management Standard

### International methodologies and standards

- ISO 14001 Environmental Management Standard

### Other

- Internal company methods
- Materiality assessment

## (2.2.2.13) Risk types and criteria considered

### Acute physical

- Cyclones, hurricanes, typhoons
- Drought
- Flood (coastal, fluvial, pluvial, ground water)

### Chronic physical

- Water stress

### Policy

- Changes to national legislation

### Liability

- Non-compliance with regulations

## (2.2.2.14) Partners and stakeholders considered

*Select all that apply*

- Customers

- Employees
- Local communities
- Regulators
- Suppliers

### (2.2.2.15) Has this process changed since the previous reporting year?

Select from:

- Yes

### (2.2.2.16) Further details of process

*We have two risk-management procedures at OMA. The first identifies and mitigates the risks inherent to the business' operation, and the second integrates the risks related to the Company's sustainability strategy (ESG). RISKS RELATED TO THE COMPANY'S ACTIVITIES The Company's Board of Directors is responsible for monitoring the main risks to which the Company is exposed, acting through the Risk Committee, which is the entity responsible for determining and managing risks to ensure business continuity. The Board also relies on the Audit Committee, which is responsible for accounting, control, and internal auditing systems to monitor the risk management process, and to supervise and approve the results of risk management. OMA uses a risk-classification methodology, which places risks into five categories; compliance, operating, financial, market, and strategic. These risks are placed on a risk map that allows the to be managed based on their impact and probability of occurring. RISKS RELATED TO THE ESG SUSTAINABILITY STRATEGY To manage the risks related to the sustainability strategy (ESG) ISO 31000 methodology was used in the materiality study that was conducted at the end of 2022. This allowed a map of current and potential ESG risks related to OMA's 15 material matters to be created, which were then classified into governance, social and environmental risks. It is also important to highlight that during 2023, we conducted an update of our Materiality Analysis in order to align our material topics to those of our major shareholder (VINCI Airports), including, among other commitments, to become Net Zero by 2030.*

[Add row]

### (2.2.7) Are the interconnections between environmental dependencies, impacts, risks and/or opportunities assessed?

#### (2.2.7.1) Interconnections between environmental dependencies, impacts, risks and/or opportunities assessed

Select from:

- Yes

#### (2.2.7.2) Description of how interconnections are assessed

*We have two risk-management procedures at OMA. The first identifies and mitigates the risks inherent to the business' operation, and the second integrates the risks related to the Company's sustainability strategy (ESG). The Company's Board of Directors is responsible for monitoring the principal risks to which the Company is exposed. To this end, it relies on the Audit Committee, which is the body responsible for determining and managing risks to ensure continuity of the business; it also establishes accounting, control, and internal audit systems to monitor the risk administration process, and to oversee and approve the results. OMA's risk classification methodology has five categories: 1. Compliance 2. Operational 3. Financial 4. Market 5. Strategic In 2023, OMA determined 64 risks, which were placed on a heat map, based on an evaluation of probability and impact. This model facilitated classification, management, and projections of financial impacts, helping us to ensure successful operation. To manage Sustainability-related risks within the strategy developed, and based on the Materiality Analysis updated in 2023, ISO 31000:2018 methodology was used as a reference. Through this process, a map of current and potential risks linked to OMA's 12 material topics was developed, while the risks were classified into: a) governance and business risks; b) our people and the communities; and c) protecting the planet. OMA has also ensured that managing occupational health and safety risks extends to the value chain, therefore, all contracts with providers establish their acceptance of those provisions according to the Federal Regulation on Occupational Health and Safety. With this guidance, risks are prevented that may impact people related to the operation of the business. Furthermore, supervisory measures are taken when third-party activities are performed within the Company's facilities.*

[Fixed row]

## **(2.3) Have you identified priority locations across your value chain?**

### **(2.3.1) Identification of priority locations**

Select from:

- Yes, we have identified priority locations

### **(2.3.2) Value chain stages where priority locations have been identified**

Select all that apply

- Direct operations

### **(2.3.3) Types of priority locations identified**

**Sensitive locations**

- Areas of high ecosystem integrity
- Areas of limited water availability, flooding, and/or poor quality of water

### **(2.3.4) Description of process to identify priority locations**

As part of our risk management process we identify risks related to environmental matters that may affect our direct operations, including natural disasters, environmental regulation, among others.

### (2.3.5) Will you be disclosing a list/spatial map of priority locations?

Select from:

- Yes, we will be disclosing the list/geospatial map of priority locations

### (2.3.6) Provide a list and/or spatial map of priority locations

MAP.pdf

[Fixed row]

## (2.4) How does your organization define substantive effects on your organization?

### Risks

#### (2.4.1) Type of definition

Select all that apply

- Quantitative

#### (2.4.2) Indicator used to define substantive effect

Select from:

- Revenue

#### (2.4.3) Change to indicator

Select from:

- Absolute decrease

#### (2.4.5) Absolute increase/ decrease figure

**(2.4.6) Metrics considered in definition**

Select all that apply

- Likelihood of effect occurring

**(2.4.7) Application of definition**

*Decrease in revenues from natural catastrophes such as earthquakes and storms.*

**Opportunities****(2.4.1) Type of definition**

Select all that apply

- Qualitative

**(2.4.6) Metrics considered in definition**

Select all that apply

- Likelihood of effect occurring

**(2.4.7) Application of definition**

*Savings in cost of electricity, % of electricity consumption derived from renewable sources and their pricing differences between the one from public utility.*

*[Add row]*

**(2.5) Does your organization identify and classify potential water pollutants associated with its activities that could have a detrimental impact on water ecosystems or human health?**

**(2.5.1) Identification and classification of potential water pollutants**

Select from:

Yes, we identify and classify our potential water pollutants

## (2.5.2) How potential water pollutants are identified and classified

*In our 13 airports, potential water pollutants are identified through an identification, evaluation and control environmental risks matrix. We also carry out several water tests in order to see the quality of the water in our airports.*

*[Fixed row]*

## (2.5.1) Describe how your organization minimizes the adverse impacts of potential water pollutants on water ecosystems or human health associated with your activities.

### Row 1

#### (2.5.1.1) Water pollutant category

Select from:

Oil

#### (2.5.1.2) Description of water pollutant and potential impacts

*According to the NOM-SEMARNAT-1996, there are certain permissible limits of pollutants in wastewater discharges that can be released. Entities must monitor these discharges and not surpass its limits. Some of the key pollutants that are monitored in water samples every 3 to 6 months are: 1. Physical-Chemical Parameters: Biochemical Oxygen Demand (BOD5): Indicates the amount of organic matter. The limit varies based on the type of water body. Chemical Oxygen Demand (COD): Another measure of organic pollutants. Total Suspended Solids (TSS): The amount of solid particles suspended in the water. pH: The acceptable range is generally 5 to 10, depending on the receiving water body. Temperature: Discharges should not increase the temperature of the receiving water body by more than 3C. 2. Nutrients: Nitrogen (as Total Nitrogen or Ammonia): Limits are set to prevent eutrophication. Phosphorus: Also regulated to prevent nutrient overloading and eutrophication. 3. Heavy Metals and Toxic Substances: Arsenic, Cadmium, Chromium, Copper, Lead, Mercury, Nickel, Zinc: Specific limits are set for each metal, varying based on the type of receiving water body. Cyanides: Regulated due to their high toxicity. Phenols: Monitored due to their toxic effects. 4. Other Organic Compounds: Oil and Grease: Limited to prevent surface film formation and toxicity to aquatic life. Detergents (MBAS - Methylene Blue Active Substances): Regulated to minimize foam and toxicity. 5. Microbiological Parameters*

#### (2.5.1.3) Value chain stage

Select all that apply

- Direct operations

#### (2.5.1.4) Actions and procedures to minimize adverse impacts

Select all that apply

- Water recycling

#### (2.5.1.5) Please explain

*As part of our commitment to water conservation, all of OMA's airports are equipped with wastewater treatment plants that operate using activated sludge systems, which ensure that the wastewater generated meets the established environmental standards. It is worth noting that the treated water from our plants is effectively utilized for watering and nurturing the green areas surrounding our airports. To ensure the utmost quality of the wastewater, regular assessments are conducted every three to six months. Samples are carefully analyzed at laboratories accredited by the Mexican Accreditation Entity and approved by the National Water Commission. These evaluations adhere to the guidelines established in NOM-001- SEMARNAT-1996, which outline the mitigation of environmental impacts when discharging treated water into the soil.*

### Row 2

#### (2.5.1.1) Water pollutant category

Select from:

- Inorganic pollutants

#### (2.5.1.2) Description of water pollutant and potential impacts

*According to the NOM-SEMARNAT-1996, there are certain permissible limits of pollutants in wastewater discharges that can be released. Entities must monitor these discharges and not surpass its limits. Some of the key pollutants that are monitored in water samples every 3 to 6 months are: 1. Temperature: Discharges should not increase the temperature of the receiving water body by more than 3C. 2. Nutrients: Nitrogen (as Total Nitrogen or Ammonia): Limits are set to prevent eutrophication. Phosphorus: Also regulated to prevent nutrient overloading and eutrophication. 3. Heavy Metals and Toxic Substances: Arsenic, Cadmium, Chromium, Copper, Lead, Mercury, Nickel, Zinc: Specific limits are set for each metal, varying based on the type of receiving water body. Cyanides: Regulated due to their high toxicity. Phenols: Monitored due to their toxic effects. 4. Other Organic Compounds: Oil and Grease: Limited to prevent surface film formation and toxicity to aquatic life. Detergents (MBAS - Methylene Blue Active Substances): Regulated to minimize foam and toxicity. 5. Microbiological Parameters

### (2.5.1.3) Value chain stage

Select all that apply

- Direct operations

### (2.5.1.4) Actions and procedures to minimize adverse impacts

Select all that apply

- Water recycling

### (2.5.1.5) Please explain

As part of our commitment to water conservation, all of OMA's airports are equipped with wastewater treatment plants that operate using activated sludge systems, which ensure that the wastewater generated meets the established environmental standards. It is worth noting that the treated water from our plants is effectively utilized for watering and nurturing the green areas surrounding our airports. To ensure the utmost quality of the wastewater, regular assessments are conducted every three to six months. Samples are carefully analyzed at laboratories accredited by the Mexican Accreditation Entity and approved by the National Water Commission. These evaluations adhere to the guidelines established in NOM-001- SEMARNAT-1996, which outline the mitigation of environmental impacts when discharging treated water into the soil.

## Row 7

### (2.5.1.1) Water pollutant category

Select from:

- Other synthetic organic compounds

### (2.5.1.2) Description of water pollutant and potential impacts

According to the NOM-SEMARNAT-1996, there are certain permissible limits of pollutants in wastewater discharges that can be released. Entities must monitor these discharges and not surpass its limits. Some of the key pollutants that are monitored in water samples every 3 to 6 months are: 1. Physical-Chemical Parameters: Biochemical Oxygen Demand (BOD5): Indicates the amount of organic matter. The limit varies based on the type of water body. Chemical Oxygen Demand (COD): Another measure of organic pollutants. Total Suspended Solids (TSS): The amount of solid particles suspended in the water. pH: The acceptable range is generally 5 to 10, depending on the receiving water body. Temperature: Discharges should not increase the temperature of the receiving water body by more than 3C. 2. Nutrients: Nitrogen (as Total Nitrogen or Ammonia): Limits are set to prevent eutrophication. Phosphorus: Also regulated to prevent nutrient overloading and eutrophication. 3. Heavy Metals and Toxic Substances: Arsenic, Cadmium, Chromium, Copper, Lead, Mercury, Nickel, Zinc: Specific limits are set for each metal, varying based on the type of receiving water body. Cyanides: Regulated due to their high toxicity. Phenols: Monitored due to their toxic effects. 4. Other Organic Compounds: Oil and Grease: Limited to prevent surface film formation and toxicity to aquatic life. Detergents (MBAS - Methylene Blue Active Substances): Regulated to minimize foam and toxicity. 5. Microbiological Parameters

Mexico

### (3.6.1.8) Organization specific description

*Power Purchase Agreement (PPA): In 2019, OMA signed a power purchase agreement to receive energy supplied by a wind farm. Through this agreement, wind power has provided a large portion of the electricity required in operations, representing 79% on average of total consumption since 2020. Investment in Solar Panels at our 13 airports: Since 2021, we have invested more than Ps.270 million pesos in the installation of solar panels, with an aggregate capacity of 9.64 MW across our 13 airports. Approximately 17% of the company's energy consumption needs were produced by our solar panels in 2023. Investment in Energy-Efficient Systems: During 2022, the Company began switching runway lighting technology from halogen to LED and solar at the airports in Reynosa, Acapulco, Monterrey, Mazatlán, Durango, Torreón and Zacatecas. Also in 2023, OMA finalized the installation and startup of battery banks with added storage capacity of 11.8 MWp in the airports in Monterrey, Chihuahua, Ciudad Juárez, Mazatlán, Acapulco, Culiacán, Durango, Reynosa, Torreón, Zacatecas y Zihuatanejo allowing us to reduce consumption from the grid during peak hours.*

### (3.6.1.9) Primary financial effect of the opportunity

Select from:

- Yes

### (4.1.2.3) Policies which outline the positions' accountability for this environmental issue

Select all that apply

- Other policy applicable to the board, please specify :Regulations for the Corporate Practices, Finance, Planning, and Sustainability; Regulations for the Audit Committee; Sustainability Policy

### (4.1.2.4) Frequency with which this environmental issue is a scheduled agenda item

Select from:

- Scheduled agenda item in some board meetings – at least annually

### (4.1.2.5) Governance mechanisms into which this environmental issue is integrated

Select all that apply

- Reviewing and guiding annual budgets
- Overseeing the setting of corporate targets
- Monitoring progress towards corporate targets
- Approving corporate policies and/or commitments
- Reviewing and guiding innovation/R&D priorities
- Monitoring compliance with corporate policies and/or commitments
- Reviewing and guiding the assessment process for dependencies, impacts, risks, and opportunities
- Overseeing and guiding major capital expenditures
- Monitoring the implementation of the business strategy
- Overseeing reporting, audit, and verification processes
- Overseeing and guiding the development of a business strategy
- Monitoring supplier compliance with organizational requirements

### (4.1.2.7) Please explain

*The Company has two supporting Committees: the Audit Committee and the Corporate Practices, Finance, Planning and Sustainability Committee. The Audit Committee oversees compliance with corporate policies, internal control, accounting and financial information. It evaluates the performance of the independent auditor and proposes the choice of external auditor. It is also responsible for evaluating, identifying and controlling risks to which the Company may be subject to. The Corporate Practices Committee is responsible for supervising the ethical principles by which OMA operates. It also assesses the investment and financing policies, establishes long-term strategic planning, and identifies the risks to which the Organization is exposed in sustainability, economic, financial, social, and environmental matters. It is also responsible for creating, proposing and submitting the sustainability guidelines of the Company, assist the Board in matters related to sustainability, and support the Company's Subsidiaries in defining sustainability objectives.*

## C5. Business strategy

### (5.1) Does your organization use scenario analysis to identify environmental outcomes?

#### Climate change

##### (5.1.1) Use of scenario analysis

Select from:

- No, but we plan to within the next two years

##### (5.1.3) Primary reason why your organization has not used scenario analysis

Select from:

- Not an immediate strategic priority

##### (5.1.4) Explain why your organization has not used scenario analysis

*OMA has been working on different strategies to reduce its carbon footprint, whether by self-generated energy or by new technologies. However, we intend for the next years to perform a climate-related scenario analysis.*

#### Water

##### (5.1.1) Use of scenario analysis

Select from:

- No, but we plan to within the next two years

##### (5.1.3) Primary reason why your organization has not used scenario analysis

Select from:

- Not an immediate strategic priority

#### **(5.1.4) Explain why your organization has not used scenario analysis**

*OMA has been working on different strategies to reduce its carbon footprint, whether by self-generated energy or by new technologies. However, we intend for the next years to perform a climate-related scenario analysis.*

*[Fixed row]*

#### **(5.2) Does your organization's strategy include a climate transition plan?**

##### **(5.2.1) Transition plan**

*Select from:*

No, but we have a climate transition plan with a different temperature alignment

##### **(5.2.2) Temperature alignment of transition plan**

*Select from:*

Other, please specify :Reducing Scope 1 and 2 emissions by two thirds by 2030 and becoming Net Zero by 2050

##### **(5.2.3) Publicly available climate transition plan**

*Select from:*

Yes

##### **(5.2.4) Plan explicitly commits to cease all spending on, and revenue generation from, activities that contribute to fossil fuel expansion**

*Select from:*

No, but we plan to add an explicit commitment within the next two years

##### **(5.2.6) Explain why your organization does not explicitly commit to cease all spending on and revenue generation from activities that contribute to fossil fuel expansion**

*In 2019, OMA signed a power purchase agreement to receive energy supplied by a wind farm. Through this agreement, wind power has provided a large portion of the electricity required in operations, representing 79% on average of total consumption since 2020. Historically the contract has supplied us with energy above the minimum required, however we cannot assure that this will be the case in following years.*

### **(5.2.7) Mechanism by which feedback is collected from shareholders on your climate transition plan**

Select from:

- We do not have a feedback mechanism in place, but we plan to introduce one within the next two years

### **(5.2.10) Description of key assumptions and dependencies on which the transition plan relies**

*At OMA, we are committed in providing the best infrastructure focusing on being as sustainable and efficient as possible. In order to constantly reduce our environmental footprint, various strategies have been defined to minimize demand for fossil fuels, electricity from non-renewable sources, water consumption and to transition towards a circular economy. Some of these strategies are: - Power Purchase Agreement: In 2019, OMA signed a power purchase agreement to receive energy supplied by a wind farm. Through this agreement, wind power has provided a large portion of the electricity required in operations, representing 79% on average of total consumption since 2020. - Investment in Solar Panels at our 13 Airports: Since 2021, we have invested more than Ps.270 million pesos in the installation of solar panels, with an aggregate capacity of 9.64 MW across our 13 airports. Approximately 17% of the company's energy consumption needs were produced by our solar panels in 2023. -Investment in Energy-Efficient Systems: During 2022, the Company began switching runway lighting technology from halogen to LED and solar at the airports in Reynosa, Acapulco, Monterrey, Mazatlán, Durango, Torreón and Zacatecas. Also in 2023, OMA finalized the installation and startup of battery banks with added storage capacity of 11.8 MWp in the airports in Monterrey, Chihuahua, Ciudad Juárez, Mazatlán, Acapulco, Culiacán, Durango, Reynosa, Torreón, Zacatecas y Zihuatanejo allowing us to reduce consumption from the grid during peak hours.*

### **(5.2.11) Description of progress against transition plan disclosed in current or previous reporting period**

*During this period we have aligned to three fundamental objectives of our major shareholder VINCI, which are aligned towards carbon neutrality and diminishment of carbon footprint. These objectives are: Reduction of 2/3 of Scope 1 and 2 emissions by 2030, 20% reduction in Scope 3 GHG emissions by 2030, 50% reduction in water consumption per passenger by 2030, zero phytosanitary products in use by 2025, zero waste to landfill by 2030, becoming Net Zero by 2050.*

### **(5.2.12) Attach any relevant documents which detail your climate transition plan (optional)**

[OMA\\_Sustainability\\_2022.pdf](#)

### **(5.2.13) Other environmental issues that your climate transition plan considers**

Select all that apply

- Water

### (5.2.14) Explain how the other environmental issues are considered in your climate transition plan

*The climate transition plan includes reducing by 50% water consumption per passenger by 2030, sending zero waste to landfill by 2030 and zero use of phyto-sanitary products by 2025*

### (5.2.15) Primary reason for not having a climate transition plan that aligns with a 1.5°C world

Select from:

- Not an immediate strategic priority

### (5.2.16) Explain why your organization does not have a climate transition plan that aligns with a 1.5°C world

*Our objectives are aligned to those of our major shareholder VINCI Concessions. However, we believe this objectives align to the 1.5 C goal, since we have committed to reduce Scope 1 and 2 emissions by two-thirds by 2030 and becoming Net Zero by 2050.*

*[Fixed row]*

## (5.3) Have environmental risks and opportunities affected your strategy and/or financial planning?

### (5.3.1) Environmental risks and/or opportunities have affected your strategy and/or financial planning

Select from:

- Yes, both strategy and financial planning

### (5.3.2) Business areas where environmental risks and/or opportunities have affected your strategy

Select all that apply

- Products and services
- Operations

*[Fixed row]*

### (5.3.1) Describe where and how environmental risks and opportunities have affected your strategy.

**Products and services**

### (5.3.1.1) Effect type

Select all that apply

- Opportunities

### (5.3.1.2) Environmental issues relevant to the risks and/or opportunities that have affected your strategy in this area

Select all that apply

- Climate change

### (5.3.1.3) Describe how environmental risks and/or opportunities have affected your strategy in this area

*Even though we have not performed a climate-related scenario analysis, we have heavily invested in initiatives focused on generating a positive impact and reduce our carbon footprint. Our operations have benefitted from initiatives such as implementation of solar panels, new technologies, as well as leveraging our position in Mexico to participate in relevant environmental projects, such as our Power Purchase Agreement, which provides us with wind-generated energy. As a result of the aforementioned, our services are provided using cleaner sources of energy.*

Climate change

Water

## Other value chain stakeholders

### (5.11.1) Engaging with this stakeholder on environmental issues

Select from:

Yes

### (5.11.2) Environmental issues covered

Select all that apply

Climate change

Water

[Fixed row]

### (5.11.1) Does your organization assess and classify suppliers according to their dependencies and/or impacts on the environment?

	Assessment of supplier dependencies and/or impacts on the environment
Climate change	Select from: <input checked="" type="checkbox"/> No, we do not currently assess the dependencies and/or impacts of our suppliers, but we plan to do so within the next two years

[Fixed row]

### (5.11.2) Does your organization prioritize which suppliers to engage with on environmental issues?

#### Climate change

### (5.11.2.1) Supplier engagement prioritization on this environmental issue

Select from:

- Yes, we prioritize which suppliers to engage with on this environmental issue

### (5.11.2.2) Criteria informing which suppliers are prioritized for engagement on this environmental issue

Select all that apply

- Business risk mitigation  
 Regulatory compliance

### (5.11.2.4) Please explain

*We have a Code of Ethics applicable and shared with all our Suppliers, which among other matters, establishes the following: Our foremost priority is the health and security of our employees and all the personnel involved in our operations. We are also sure that complying with environmental regulations helps reduce our operations' impact on the environment. We, therefore, expect our Strategic Partners to: • Ensure that their work is conducted within a safe and secure environment designed to prevent accidents and minimize health hazards and that they are in compliance with current labor and health laws and minimize damaging effects on the community in general; Implement safety measures for all aspects of their work (including regulatory and contractual requirements) and promote safety in each phase of its work processes with the collaborative conduct and commitment of all its employees; • Conduct all its operations with the utmost responsibility, following applicable environmental laws, sustainability policies, and standards.*

[Fixed row]

### (5.11.5) Do your suppliers have to meet environmental requirements as part of your organization's purchasing process?

#### Climate change

### (5.11.5.1) Suppliers have to meet specific environmental requirements related to this environmental issue as part of the purchasing process

Select from:

- No, but we plan to introduce environmental requirements related to this environmental issue within the next two years

### (5.11.5.2) Policy in place for addressing supplier non-compliance

Select from:

No, we do not have a policy in place for addressing non-compliance

### (5.11.5.3) Comment

Suppliers must abide to the Suppliers Code of Ethics established by OMA, where it is stated that all strategic partners should conduct all its operations with the utmost responsibility, following applicable environmental laws, sustainability policies, and standards. For further information of our Code of Ethics for Suppliers, please visit the following link: <https://ir.oma.aero/wp-content/uploads/2023/07/01.-Code-of-Ethics-and-Rules-of-Conduct-for-Suppliers-Subcontractors-and-Business-Partners-1.pdf>

[Fixed row]

## (5.11.7) Provide further details of your organization's supplier engagement on environmental issues.

### Climate change

#### (5.11.7.2) Action driven by supplier engagement

Select from:

No other supplier engagement

[Add row]

## (5.11.9) Provide details of any environmental engagement activity with other stakeholders in the value chain.

### Climate change

#### (5.11.9.1) Type of stakeholder

Select from:

Investors and shareholders

#### (5.11.9.2) Type and details of engagement

## Education/Information sharing

- Share information about your products and relevant certification schemes
- Share information on environmental initiatives, progress and achievements

### (5.11.9.3) % of stakeholder type engaged

Select from:

- Unknown

### (5.11.9.4) % stakeholder-associated scope 3 emissions

Select from:

- Unknown

### (5.11.9.5) Rationale for engaging these stakeholders and scope of engagement

*In an interconnected world where companies play a determining role in pursuing the United Nations' Sustainable Development Goals, dialogue and disclosure to our stakeholders is an important activity that not only allows valuable trusting relationships to be built; these relationships are also a fundamental source of information for identifying risks and opportunities, as well as the impacts of our activity.*

### (5.11.9.6) Effect of engagement and measures of success

*Through the disclosure of ESG topics we are available to set targets that are comparable across our peers and receive feedback from different stakeholders regarding our ESG performance.*

## Water

### (5.11.9.1) Type of stakeholder

Select from:

- Investors and shareholders

### (5.11.9.2) Type and details of engagement

## Education/Information sharing

- Share information about your products and relevant certification schemes

### (5.11.9.3) % of stakeholder type engaged

Select from:

- Unknown

### (5.11.9.5) Rationale for engaging these stakeholders and scope of engagement

*In an interconnected world where companies play a determining role in pursuing the United Nations' Sustainable Development Goals, dialogue and disclosure to our stakeholders is an important activity that not only allows valuable trusting relationships to be built; these relationships are also a fundamental source of information for identifying risks and opportunities, as well as the impacts of our activity.*

### (5.11.9.6) Effect of engagement and measures of success

*Through the disclosure of ESG topics we are available to set targets that are comparable across our peers and receive feedback from different stakeholders regarding our ESG performance.*

## Climate change

### (5.11.9.1) Type of stakeholder

Select from:

- Other value chain stakeholder, please specify :Employees

### (5.11.9.2) Type and details of engagement

## Education/Information sharing

- Educate and work with stakeholders on understanding and measuring exposure to environmental risks
- Share information on environmental initiatives, progress and achievements

### (5.11.9.3) % of stakeholder type engaged

Select from:

Unknown

#### (5.11.9.4) % stakeholder-associated scope 3 emissions

Select from:

Unknown

#### (5.11.9.5) Rationale for engaging these stakeholders and scope of engagement

*As part of our commitment to environmental awareness and education, we actively participated in the Environmental Week. During this week, both at our airports and corporate offices, we centered discussions around aviation's impact on the environment.*

#### (5.11.9.6) Effect of engagement and measures of success

*As part of our commitment to environmental awareness and education, we actively participated in the Environmental Week, a program inspired by the VINCI Group. During this week, both at our airports and corporate offices, we centered discussions around aviation's impact on the environment. The program covered a range of critical topics, including:*

- Climate change: Understanding the challenges posed by climate change and exploring ways to reduce our carbon footprint.*
- Water conservation: Promoting responsible water usage and conservation practices.*
- Energy: Implementing measures to optimize energy consumption.*
- Biodiversity: Recognizing the importance of preserving natural ecosystems and promoting biodiversity.*
- Airport Carbon Accreditation: Striving for continuous improvement in carbon management.*
- Development objectives. Aligning our efforts with global sustainable development objectives.*

*[Add row]*

## C6. Environmental Performance - Consolidation Approach

(6.1) Provide details on your chosen consolidation approach for the calculation of environmental performance data.

	Consolidation approach used	Provide the rationale for the choice of consolidation approach
Climate change	Select from: <input checked="" type="checkbox"/> Financial control	Same consolidation approach as last year.
Water	Select from: <input checked="" type="checkbox"/> Financial control	Same consolidation approach as last year.
Plastics	Select from: <input checked="" type="checkbox"/> Financial control	Same consolidation approach as last year.
Biodiversity	Select from: <input checked="" type="checkbox"/> Financial control	Same consolidation approach as last year.

[Fixed row]

## C7. Environmental performance - Climate Change

### (7.1) Is this your first year of reporting emissions data to CDP?

Select from:

No

#### (7.1.1) Has your organization undergone any structural changes in the reporting year, or are any previous structural changes being accounted for in this disclosure of emissions data?

	Has there been a structural change?
	<i>Select all that apply</i> <input checked="" type="checkbox"/> No

[Fixed row]

#### (7.1.2) Has your emissions accounting methodology, boundary, and/or reporting year definition changed in the reporting year?

	Change(s) in methodology, boundary, and/or reporting year definition?
	<i>Select all that apply</i> <input checked="" type="checkbox"/> No

[Fixed row]

**(7.2) Select the name of the standard, protocol, or methodology you have used to collect activity data and calculate emissions.**

Select all that apply

- The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (Revised Edition)
- The Greenhouse Gas Protocol: Scope 2 Guidance

**(7.3) Describe your organization's approach to reporting Scope 2 emissions.**

**(7.3.1) Scope 2, location-based**

Select from:

- We are not reporting a Scope 2, location-based figure

**(7.3.2) Scope 2, market-based**

Select from:

- We are reporting a Scope 2, market-based figure

**(7.3.3) Comment**

*To accurately measure emissions, OMA adheres to Mexico's SEMARNAT regulations, including the General Law on Climate Change (LGCC), its Regulation, and the National Emissions Registry (RENE). However, for purposes of reporting, OMA utilizes the market-based methodology of the GHG Protocol to calculate the total quantity of Scope 1 and 2 CO2 emissions. This approach considers the emissions intensity factor for each energy source used by OMA (Federal Electricity Commission (CFE), Power Purchase Agreement, and solar panels) and provides an accurate representation of both direct and indirect emissions. It also allows for the inclusion of the benefits derived from installed and acquired renewable energy.*

[Fixed row]

**(7.4) Are there any sources (e.g. facilities, specific GHGs, activities, geographies, etc.) of Scope 1, Scope 2 or Scope 3 emissions that are within your selected reporting boundary which are not included in your disclosure?**

Select from:

No

## (7.5) Provide your base year and base year emissions.

### Scope 1

#### (7.5.1) Base year end

12/31/2018

#### (7.5.2) Base year emissions (metric tons CO2e)

1222.6

#### (7.5.3) Methodological details

*We use a market based approach according to the GHG protocol. During 2018, which is our base year for all of our objectives we used a factor of 0.527 per MWh for Scope 2 emissions.*

### Scope 2 (location-based)

#### (7.5.1) Base year end

12/31/2018

#### (7.5.2) Base year emissions (metric tons CO2e)

0

#### (7.5.3) Methodological details

n.a.

### Scope 2 (market-based)

### (7.5.1) Base year end

12/31/2018

### (7.5.2) Base year emissions (metric tons CO2e)

31764.26

### (7.5.3) Methodological details

*We use a market based approach according to the GHG protocol. During 2018, which is our base year for all of our objectives we used a factor of 0.527 per MWh for Scope 2 emissions.*

## Scope 3 category 1: Purchased goods and services

### (7.5.1) Base year end

## **(7.6) What were your organization’s gross global Scope 1 emissions in metric tons CO2e?**

### **Reporting year**

#### **(7.6.1) Gross global Scope 1 emissions (metric tons CO2e)**

1122.74

#### **(7.6.3) Methodological details**

*For emissions measurement, OMA calculates the quantity of Scope 1 and 2 emissions in compliance with SEMARNAT regulations, including the General Law on Climate Change (LGCC), its regulations, and the National Emissions Registry (RENE). However, for reporting purposes, OMA calculates the total CO2 emissions in Scopes 1 and 2 using the “marketbased” method from the Greenhouse Gas Protocol (GHG Protocol). Under this methodology, emission intensity factors are applied to each of the three energy sources used by OMA (CFE, PPAs, and solar panels). This approach provides an accurate representation of total direct and indirect emissions, allowing for the recognition of benefits from acquired and installed renewable energy (third-party). As part of the measurement process, the company has developed a well-founded record that enables precise measurement of emissions in both Scopes. For Scope 1, sources related to non-renewable fuel consumption are considered, while Scope 2 includes emissions from electricity consumption, both expressed in CO2 equivalent.*

### **Past year 1**

#### **(7.6.1) Gross global Scope 1 emissions (metric tons CO2e)**

1123.5

#### **(7.6.2) End date**

12/31/2022

#### **(7.6.3) Methodological details**

*For emissions measurement, OMA calculates the quantity of Scope 1 and 2 emissions in compliance with SEMARNAT regulations, including the General Law on Climate Change (LGCC), its regulations, and the National Emissions Registry (RENE). However, for reporting purposes, OMA calculates the total CO2 emissions in Scopes 1 and 2 using the “marketbased” method from the Greenhouse Gas Protocol (GHG Protocol). [Fixed row]

**(7.30.14) Provide details on the electricity, heat, steam, and/or cooling amounts that were accounted for at a zero or near-zero emission factor in the market-based Scope 2 figure reported in 7.7.**

#### Row 1

### (7.30.14.1) Country/area

Select from:

Mexico

### (7.30.14.2) Sourcing method

Select from:

Physical power purchase agreement (physical PPA) with a grid-connected generator

### (7.30.14.3) Energy carrier

Select from:

Electricity

### (7.30.14.4) Low-carbon technology type

Select from:

Wind

#### (7.30.14.5) Low-carbon energy consumed via selected sourcing method in the reporting year (MWh)

56901.02

#### (7.30.14.6) Tracking instrument used

Select from:

Contract

#### (7.30.14.7) Country/area of origin (generation) of the low-carbon energy or energy attribute

Select from:

Mexico

#### (7.30.14.8) Are you able to report the commissioning or re-powering year of the energy generation facility?

Select from:

No

#### (7.30.14.10) Comment

*In 2019, OMA signed a power purchase agreement to receive energy supplied by a wind farm. Through this agreement, wind power has provided a large portion of the electricity required in operations, representing 79% on average of total consumption since 2020.*

### Row 2

#### (7.30.14.1) Country/area

Select from:

Mexico

#### (7.30.14.2) Sourcing method

Select from:

Other, please specify :Installation of Solar Panels

### (7.30.14.3) Energy carrier

Select from:

Electricity

### (7.30.14.4) Low-carbon technology type

Select from:

Solar

### (7.30.14.5) Low-carbon energy consumed via selected sourcing method in the reporting year (MWh)

12490.18

### (7.30.14.6) Tracking instrument used

Select from:

No instrument used

### (7.30.14.7) Country/area of origin (generation) of the low-carbon energy or energy attribute

Select from:

Mexico

### (7.30.14.8) Are you able to report the commissioning or re-powering year of the energy generation facility?

Select from:

Yes

### (7.30.14.9) Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

2021

### **(7.30.14.10) Comment**

*Since 2021, we have invested more than Ps.270 million pesos in the installation of solar panels, with an aggregate capacity of 9.64 MW across our 13 airports. Approximately 17% of the company's energy consumption needs were produced by our solar panels in 2023.*

*[Add row]*

### **(7.30.16) Provide a breakdown by country/area of your electricity/heat/steam/cooling consumption in the reporting year.**

#### **Mexico**

#### **(7.30.16.1) Consumption of purchased electricity (MWh)**

59307.48

#### **(7.30.16.2) Consumption of self-generated electricity (MWh)**

12490.18

#### **(7.30.16.4) Consumption of purchased heat, steam, and cooling (MWh)**

0

#### **(7.30.16.5) Consumption of self-generated heat, steam, and cooling (MWh)**

0

#### **(7.30.16.6) Total electricity/heat/steam/cooling energy consumption (MWh)**

71797.66

*[Fixed row]*

### **(7.45) Describe your gross global combined Scope 1 and 2 emissions for the reporting year in metric tons CO2e per unit currency total revenue and provide any additional intensity metrics that are appropriate to your business operations.**

## Row 1

### (7.45.1) Intensity figure

0.08

### (7.45.2) Metric numerator (Gross global combined Scope 1 and 2 emissions, metric tons CO2e)

2176.77

### (7.45.3) Metric denominator

Select from:

Other, please specify :Terminal passenger

### (7.45.4) Metric denominator: Unit total

26845451

### (7.45.5) Scope 2 figure used

Select from:

Market-based

### (7.45.6) % change from previous year

20

### (7.45.7) Direction of change

Select from:

Decreased

### (7.45.8) Reasons for change

Select all that apply

Change in renewable energy consumption

### (7.45.9) Please explain

Increase in consumption from PPA Contract and Solar Panels,

[Add row]

### (7.52) Provide any additional climate-related metrics relevant to your business.

#### Row 1

#### (7.52.1) Description

Select from:

Waste

#### (7.52.2) Metric value

0.1

#### (7.52.3) Metric numerator

tons of waste recycled

#### (7.52.4) Metric denominator (intensity metric only)

tons of waste

#### (7.52.5) % change from previous year

7

#### (7.52.6) Direction of change

Select from:

Decreased

### (7.52.7) Please explain

*Lower non-hazardous waste was recycled 10% vs 16%.*

### Row 3

### (7.52.1) Description

Select from:

Other, please specify :Water consumption per passenger

### (7.52.2) Metric value

25

### (7.52.3) Metric numerator

*liters of water consumption during reporting year*

### (7.52.4) Metric denominator (intensity metric only)

*total passenger traffic*

### (7.52.5) % change from previous year

0

### (7.52.6) Direction of change

Select from:

No change

## (7.52.7) Please explain

*Due to the increase of more than three million passengers going through our airports in 2023, total water consumption increased in relation to the prior year, but thanks to OMA's water conservation strategy, water consumption per passenger remained at 0.025 m3, as compared to 2022.*

*[Add row]*

## (7.53) Did you have an emissions target that was active in the reporting year?

*Select all that apply*

Absolute target

Intensity target

### (7.53.1) Provide details of your absolute emissions targets and progress made against those targets.

#### Row 1

##### (7.53.1.1) Target reference number

*Select from:*

Abs 1

##### (7.53.1.2) Is this a science-based target?

*Select from:*

Yes, we consider this a science-based target, but we have not committed to seek validation of this target by the Science Based Targets initiative within the next two years

##### (7.53.1.4) Target ambition

*Select from:*

Well-below 2°C aligned

##### (7.53.1.5) Date target was set

01/01/2023

### (7.53.1.6) Target coverage

Select from:

Organization-wide

### (7.53.1.7) Greenhouse gases covered by target

Select all that apply

### **(7.53.2.88) Target derived using a sectoral decarbonization approach**

Select from:

No

### **(7.53.2.89) List the emissions reduction initiatives which contributed most to achieving this target**

*Power Purchase Agreement: In 2019, OMA signed a power purchase agreement to receive energy supplied by a wind farm. Through this agreement, wind power has provided a large portion of the electricity required in operations, representing 79% on average of total consumption since 2020. Investment in Solar Panels: Since 2021, we have invested more than Ps.270 million pesos in the installation of solar panels, with an aggregate capacity of 9.64 MW across our 13 airports.*

*Approximately 17% of the company's energy consumption needs were produced by our solar panels in 2023. Investment in Energy-Efficiency Systems: During 2022, the Company began switching runway lighting technology from halogen to LED and solar at the airports in Reynosa, Acapulco, Monterrey, Mazatlán, Durango, Torreón and Zacatecas. Also in 2023, OMA finalized the installation and startup of battery banks with added storage capacity of 11.8 MWp in the airports in Monterrey, Chihuahua, Ciudad Juárez, Mazatlán, Acapulco, Culiacán, Durango, Reynosa, Torreón, Zacatecas y Zihuatanejo allowing us to reduce consumption from the grid during peak hours.*

*[Add row]*

### **(7.54) Did you have any other climate-related targets that were active in the reporting year?**

Select all that apply

No other climate-related targets

### **(7.55) Did you have emissions reduction initiatives that were active within the reporting year? Note that this can include those in the planning and/or implementation phases.**

Select from:

Yes

**(7.55.1) Identify the total number of initiatives at each stage of development, and for those in the implementation stages, the estimated CO2e savings.**

	Number of initiatives	Total estimated annual CO2e savings in metric tonnes CO2e (only for rows marked *)
Under investigation	0	<i>Numeric input</i>
To be implemented	0	0
Implementation commenced	0	0
Implemented	2	13668
Not to be implemented	0	<i>Numeric input</i>

[Fixed row]

**(7.55.2) Provide details on the initiatives implemented in the reporting year in the table below.**

**(9.2.10) Provide details of your organization's emissions of nitrates, phosphates, pesticides, and other priority substances to water in the reporting year.**

### (9.2.10.1) Emissions to water in the reporting year (metric tons)

0

### (9.2.10.2) Categories of substances included

Select all that apply

- Nitrates
- Phosphates
- Pesticides

### (9.2.10.4) Please explain

*We carry out studies of the water discharged to comply with the limits established by the Environmental Law in Mexico. We don't publicly disclose the amount of emissions into water bodies.*

*[Fixed row]*

## **(9.3) In your direct operations and upstream value chain, what is the number of facilities where you have identified substantive water-related dependencies, impacts, risks, and opportunities?**

### **Direct operations**

#### (9.3.1) Identification of facilities in the value chain stage

Select from:

- No, we have not assessed this value chain stage for facilities with water-related dependencies, impacts, risks, and opportunities, but we are planning to do so in the next 2 years

#### (9.3.4) Please explain

*Water is a vital aspect in airport operations, and an indispensable resource for providing service to clients and passengers. OMA therefore focuses on rational and responsible use for reducing water consumption, with a special consideration for areas that face water stress.*

## Upstream value chain

### (9.3.1) Identification of facilities in the value chain stage

Select from:

No, we have not assessed this value chain stage for facilities with water-related dependencies, impacts, risks, and opportunities, but we are planning to do so in the next 2 years

### (9.3.4) Please explain

*Water is a vital aspect in airport operations, and an indispensable resource for providing service to clients and passengers. OMA therefore focuses on rational and responsible use for reducing water consumption, with a special consideration for areas that face water stress.*

[Fixed row]

### (9.5) Provide a figure for your organization's total water withdrawal efficiency.

	Revenue (currency)	Total water withdrawal efficiency	Anticipated forward trend
	11559079268	17548054.94	<i>We expect for water efficiency to increase since we have a target of reducing water intensity per terminal passenger in 50% by 2030.</i>

[Fixed row]

### (9.13) Do any of your products contain substances classified as hazardous by a regulatory authority?

	Products contain hazardous substances	Comment
	Select from: <input checked="" type="checkbox"/> No	Not applicable

[Fixed row]

**(9.14) Do you classify any of your current products and/or services as low water impact?**

	Products and/or services classified as low water impact	Primary reason for not classifying any of your current products and/or services as low water impact	Please explain
	Select from: <input checked="" type="checkbox"/> No, and we do not plan to address this within the next two years	Select from: <input checked="" type="checkbox"/> No instruction from management	Not applicable.

[Fixed row]

**(9.15) Do you have any water-related targets?**

Select from:

Yes

**(9.15.1) Indicate whether you have targets relating to water pollution, water withdrawals, WASH, or other water-related categories.**

	Target set in this category	Please explain
Water pollution	Select from: <input checked="" type="checkbox"/> No, and we do not plan to within the next two years	<i>Our target related to water is a 50% reduction in water consumption per passenger (liters per passenger)</i>
Water withdrawals	Select from: <input checked="" type="checkbox"/> No, and we do not plan to within the next two years	<i>Our target related to water is a 50% reduction in water consumption per passenger (liters per passenger)</i>
Water, Sanitation, and Hygiene (WASH) services	Select from: <input checked="" type="checkbox"/> No, and we do not plan to within the next two years	<i>Our target related to water is a 50% reduction in water consumption per passenger (liters per passenger)</i>
Other	Select from: <input checked="" type="checkbox"/> Yes	<i>Rich text input [must be under 1000 characters]</i>

[Fixed row]

## (9.15.2) Provide details of your water-related targets and the progress made.

### Row 1

#### (9.15.2.1) Target reference number

Select from:

Target 1

#### (9.15.2.2) Target coverage

Select from:

Organization-wide (direct operations only)

### (9.15.2.3) Category of target & Quantitative metric

#### Water consumption

Other water consumption, please specify :50% reduction in water consumption per passenger (liters/PAX) by 2030 (baseline 2018)

### (9.15.2.4) Date target was set

05/01/2023

### (9.15.2.5) End date of base year

12/31/2018

### (9.15.2.6) Base year figure

33

### (9.15.2.7) End date of target year

12/31/2030

### (9.15.2.8) Target year figure

16.5

### (9.15.2.9) Reporting year figure

25

### (9.15.2.10) Target status in reporting year

Select from:

Underway

### (9.15.2.11) % of target achieved relative to base year

### (9.15.2.12) Global environmental treaties/initiatives/ frameworks aligned with or supported by this target

Select all that apply

None, alignment not assessed

### (9.15.2.13) Explain target coverage and identify any exclusions

*This target considers water consumption across all our airports network.*

### (9.15.2.14) Plan for achieving target, and progress made to the end of the reporting year

*To fulfill our commitment to responsible water consumption, we have implemented a range of measures, including:*

- *Installation of water treatment plants at all 13 airports.*
- *Analysis of processes to identify opportunities for reducing water consumption.*
- *Replacement of conventional equipment with ecoefficient alternatives.*
- *Installation of shut-off valves to prevent waste.*
- *Regular inspection of pipes to detect and address any leaks.*
- *Utilization of water created by air conditioning condensation.*
- *Calibration of bathroom fixtures to ensure efficient water use.*
- *Incorporation of presence sensors and automatic shut-off taps in restrooms.*
- *Implementation of water flow sensors to monitor usage.*
- *Reuse of treated water for irrigation purposes in green zones.*
- *Water conservation awareness programs.*
- *Maintenance of facilities.*

### (9.15.2.16) Further details of target

*During 2023, we have aligned to the objectives of our major shareholder VINCI Airports. Among other targets the water consumption objective was adopted by OMA in order to reduce water intensity consumption in 50% by 2030.*

*[Add row]*

## C10. Environmental performance - Plastics

### (10.1) Do you have plastics-related targets, and if so what type?

	Targets in place	Please explain
	Select from: <input checked="" type="checkbox"/> No, but we plan to within the next two years	<i>We currently don't have any targets related to plastic reduction or usage. However, we have the goal of zero-waste to landfill by 2030.</i>

[Fixed row]

### (10.2) Indicate whether your organization engages in the following activities.

#### Production/commercialization of plastic polymers (including plastic converters)

##### (10.2.1) Activity applies

Select from:

No

##### (10.2.2) Comment

n.a.

#### Production/commercialization of durable plastic goods and/or components (including mixed materials)

##### (10.2.1) Activity applies

Select from:

No

### (10.2.2) Comment

n.a.

## Usage of durable plastics goods and/or components (including mixed materials)

### (10.2.1) Activity applies

Select from:

Yes

### (10.2.2) Comment

*Our Company's operations generate non-hazardous waste (special handling) from complementary and commercial airport services, such as: common waste, inorganic and organic waste, paper, cardboard, PET, aluminum, and garden waste, among others. Each airport classifies and segregates waste in compliance with state ecological ordinances.*

## Production/commercialization of plastic packaging

### (10.2.1) Activity applies

Select from:

No

### (10.2.2) Comment

n.a.

## Production/commercialization of goods/products packaged in plastics

### (10.2.1) Activity applies

Select from:

No

### (10.2.2) Comment

n.a.

## Provision/commercialization of services that use plastic packaging (e.g., food services)

### (10.2.1) Activity applies

Select from:

Yes

### (10.2.2) Comment

*Our Company's operations generate non-hazardous waste (special handling) from complementary and commercial airport services, such as: common waste, inorganic and organic waste, paper, cardboard, PET, aluminum, and garden waste, among others. Each airport classifies and segregates waste in compliance with state ecological ordinances.*

## Provision of waste management and/or water management services

### (10.2.1) Activity applies
